## Babe of the Day Promotion

Babe of the Day 2.0 is an application with distinct parts. These parts are separated by tabs. The five tabs are: Models, Local Girls, Sports Babes, Wild Card and All Uploads

Models are in a calendar style format with a new model appearing every day in a thumbnail that when clicked will display the girl in a larger photo.

Local Girls is a section where each radio station can have users upload pictures to compete both locally or nationally for a professional photo shoot paid for by Dell Sports.

Sports Babes are simply hot girls involved in sports somehow... maybe they are athletes, sportscasters, fans, cheerleaders, etc.

The All Uploads tab is simply a way to see all the user uploaded photos from around the country.

Finally, the "Wild Card" tab is optional and is given to each radio station to run their custom promotion. Each station dictates the name of the tab and what kinds of photos need to be uploaded in this section.

- Users can rate any picture
- Users can comment on any picture.
- Users can upload their own photos into any section except the model tab
- Users will have a chance to win cash and prizes from Dell Sports
- Any user click will return a page view for each media partner
- Content will change daily. This will exponentially drive traffic to your site
- All users will have access to view photos uploaded locally and nationally
- Flagging system established for your convenience and protection
